

2018 STEM EDUCATOR SUMMITS

The **2018 STEM Educator Summits** bring **together formal and informal** educators who work with students of color, underserved, Native American, and Alaska Native students, offering them exposure to new culturally relevant and hands-on NASA oriented STEM activities.

These summits offer the opportunity to formal and informal educators to **organize summer camps** for middle and/or high school students in their own communities in Summer 2018.

Camps will incorporate material from NASA missions in three main areas: **1) environmental sciences and remote sensing; 2) robotics and surface exploration; 3) rockets and exploration of the solar system.**

Seeking a collaborative effort
between SG and SMD

I have agreements from most neighboring state SG's that if they pay educator airfares, SMD through our program will provide full housing cost so the workshops would be free to educators.

2018 STEM Educator Summits EXPANDING NASA OPPORTUNITIES FOR STUDENTS OF COLOR, UNDERSERVED, NATIVE AMERICAN AND ALASKA NATIVE STUDENTS

ELLENSBURG, WA
JUNE 25-29, 2018

SEATTLE, WA
JULY 10-14, 2018
