

National Council of Space Grant  
Directors 2004 Fall Meeting

*Program Coordinator Meeting*  
*October 23, 2004*

**Magui Cardona**  
Space Grant Administrative Fellow  
Office of Education

National Space Grant  
College and Fellowship  
Program

# Agenda

- Steps in the Procurement Process – how a proposal becomes a grant...
- FY05 Budget Call – the mechanics of how its going to work this year.
- Workforce Development Proposals – how to make your proposal more competitive
- Space Grant Website – updates and guidance
- Longitudinal Tracking – something new!

# Government Bureaucracy at its best!

# Steps in the Procurement Process

## How a proposal becomes a grant...

### ➤ Proposal/Report Review

- ✓ HQ SG staff (Diane, Magui & Katie) review your progress report and assess progress toward stated goals.
- ✓ Proposed activities and programs are also reviewed and approved.

### ➤ Budget Review

- ✓ HQ staff review your budget submission for completeness, allowability of costs and minimum match requirement.
- ✓ Additional information and/or resubmission of budget paperwork is requested from consortia, if needed.

# Steps in the Procurement Process

## How a proposal becomes a grant... (cont.)

### ➤ Resource Analyst

- ✓ HQ Resource Analyst verifies amount awarded and transfers money to GSFC. Only then can HQ SG staff send the award package to the Grants Office.
- ✓ GSFC Resource Analyst verifies money has been transferred from HQ, enters the award in *The Log*, and sends the package to the Procurement Office.
- ✓ HQ SG staff verify entries in *The Log* on a weekly basis to ensure accuracy.

### ➤ Contracting Officer

- ✓ The package is assigned to a Contracting Officer to write the award document, including any special conditions.
- ✓ A copy of the award is mailed to the PI & COTR (Diane).

# Steps in the Procurement Process

## What happens if you change your mind?

- Changes to the proposed budget of less than 10% of the total NASA dollars can be made without prior approval.
- There are **exceptions**:
  - ✓ No money can be transferred out of **fellowships/scholarships** without prior approval.
  - ✓ No reductions to the total **minimum match requirement** are allowed without prior approval. This requires an administrative change and a new supplement to be issued.
  - ✓ No **equipment** purchases are allowed with NASA dollars.
  - ✓ **International travel** is limited to \$500 per year and each trip requires prior approval.

# Steps in the Procurement Process

## How do I get prior approval?

- Send a request via fax or email, through your Sponsored Programs Office, to Diane (cc: Magui). We will forward the approved request to the Grants Officer.
- If you send your request directly to the Grants Officer it will only take longer – they forward it to Diane for her approval and then she has to forward it back to them.

# FY05 Budget Call

## How is it different this year?

- No progress report needed!
  - ✓ You will submit a final report to your current grant 90 days after it expires – don't need to worry about it until next Spring (CMIS).
- You will submit a **5-year budget** – even if your consortium is on probation.
  - ✓ A detailed budget narrative is only needed for Year 1.
- You will submit your **consortium's strategic plan** with your proposal
  - ✓ If your consortium does not have one in place, you will be expected to develop one and submit it with your renewal next year.

## How is it different this year? (cont.)

- No-cost extensions have been approved for up to three months on your current grant, to run concurrently with your new award.
  - ✓ Requests need to be made before your grant expires.
  - ✓ Requests are accepted via email to Magui from your Sponsored Programs Office, not the Director.
- You will be allowed to de-obligate any unused funds from your current award and re-obligate them to your new award.
  - ✓ Need proper **justification** – money must be committed to programs, even if it has not been obligated.
  - ✓ Detailed instructions to follow.

# Workforce Development Proposals

## How to make them more competitive

- Be able to identify individual project budgets to facilitate partial funding decisions.
- No match is required.
- Separate electronic submission for each type of proposal: Single Consortium, Multi-Consortium and ISS Engineering Outreach
- Articulate a coherent strategy for the mix of projects

## Migration to the Portal

- By CIO directive, all NASA websites have to be migrated to the Portal by the end of the year.
  - ✓ Center pages are to be migrated by Nov. 30. All remaining HQ pages to follow.
  - ✓ Space Grant is in queue to be the first Higher Education program to be migrated.

## Section 508 Compliance

- By Federal law, all NASA websites have to be compliant with Section 508 of the Rehabilitation Act (29 U.S.C. 794d).
  - ✓ Not all consortia pages are compliant, including National program website – noted during Website Review (15<sup>th</sup> Year Evaluation).
  - ✓ Once migrated to the portal, we will not be able to maintain a link to consortia sites that are not compliant.

## Appropriate use of the “meatball”

- As NASA-sponsored programs, consortia websites are expected to display the NASA insignia or “meatball”.
  - ✓ Random checks of consortia sites revealed some have made inappropriate use of the NASA insignia, others don’t display it at all.
- It is important to display it appropriately.
  - ✓ No alterations or embedding are allowed.
  - ✓ Placement should be at the bottom of the landing page, including the following statement:

“The State Space Grant Consortium is funded through a NASA Training Grant”

# Longitudinal Tracking

How do we keep track of our students to find out where they end up?

- Through the 15<sup>th</sup> Year Evaluation process, it was revealed that not all consortia really know what happens to their students once they leave their programs.
- Some consortia have exemplary longitudinal tracking models that could be replicated throughout the National Network.
