Director input to Diane for the next 5 year RFP

Space Grant FY2010 - FY2014, Opportunity for Input

1.
The purpose of this very short survey is to provide each consortium with the opportunity to provide input as we move into the next five years of the Space Grant Program. Please provide your input in the form of concise and constructive statements. Given the goal and objectives of Space Grant:

1. How can Space Grant be more effectively leveraged to contribute to the goals of NASA Education and the Agency overall in a way that currently isn’t being done?

2. What key areas would be important for Space Grant to emphasize in the next five years (e.g. Workforce Development, Minority Serving Institution Involvement, etc.)?

3. In terms of national programmatic policy, are there specific areas that you feel require additional information or definition? Please be specific.

4. If applicable, please provide any additional constructive input.
