Welcome!

About the NDSGC

In 1990 the state of North Dakota received a Space Grant College Capability Enhancement Grant from NASA. The North Dakota Space Grant Consortium has its headquarters at the Department of Space Studies at the [John D. Odegard School of Aerospace Sciences](#) at the University of North Dakota.

Mission:

The North Dakota Space Grant Program has continued its well-regarded foci in internet-delivered higher education, education financial assistance all across North Dakota (especially to women and minority students), involvement of tribal colleges, and public outreach activities. This has been done to help achieve the primary goal of NDSGC which is making the education infrastructure in North Dakota more NASA-relevant. >> [read more](#)

Welcome to the NASA Nebraska Space Grant Consortium's website!

As part of NASA's National Space Grant College and Fellowship Program, we are funded to promote aerospace-related research, education, and public service programs to encourage a Diverse Workforce. This is accomplished through a national network of colleges, universities, Industry and Federal Agency Partners.

The Nebraska Space Grant offers several Funding Opportunities, including mini-grants and travel grants. Through our Higher Education and Public Programs, we focus on teacher training and workforce development. This is furthered through a strong partnership with the UNO College of Education. Additionally, we support NASA Education's Pathfinder Initiatives.
