2010 Fall Meeting
National Council of Space Grant Directors
Rhode Island School of Design

Michael Lye
Rhode Island School of Design
mlye@risd.edu

15 October 2010
What is the Rhode Island School of Design?
What do a bunch of artists and designers have to do with NASA?
The National Aeronautics and Space Administration cordially invites you to attend a Launch of the Space Shuttle at the John F. Kennedy Space Center, Florida.

In the event of a postponement, this invitation is valid for the next scheduled launch attempt of this mission.
MOBILE LUNAR HABITAT
CONCEPT NR. 1

Johan Hedberg
2007
NASA Habitability Design Center Internship 2010
We began by brainstorming an ideal cabinet layout. After we talked to some of the researchers in charge of stocking the Medical Center, we were able to tailor the compartments to their needs. One thing that we realized early on, was that our compartment depth was limited, so we posed many ideas that kept as close to the wall as possible. We were also asked to try and limit the desk space required to so down tools.
After our initial brainstorm, we were evaluated by the HDU project lead. We were informed that our project had been fully given the green light for desert testing and that we would need to create a working prototype in 4 weeks. He encouraged us to use pre-existing drawers to reduce manufacture costs.
design process
Thank you
